EXPERIENCE

Full-Stack Developer

RoundTechSquare

📅 Jun 2024 – Present   📍 Remote

- Architected and optimised **frontend performance** on **client-facing platforms** using **Advanced React Patterns**, cutting load times by **25%**.
- Led **end-to-end delivery** of **5+ concurrent client projects** (incl. e-commerce & B2B portals), achieving **95% client satisfaction**.
- Directed **UI development** for a new **e-commerce launch** and executed a **UI/UX overhaul** for another client platform, improving user flow.
- Resolved critical **post-launch bugs** (authentication and state management) under pressure for an **e-commerce platform**, ensuring **stability** under tight deadlines.
- Adapted rapidly to requirements and delivered a complete **guest checkout flow** for an **e-commerce site** overnight.
- Proactively developed the **'GCP Media Viewer'** internal tool, which improved workflow. Additionally, I identified and escalated a **GCP security vulnerability**.
- Delivered robust **end-to-end system integrations** for client projects, boosting performance and **scalability by 40%**.

React Developer Intern

Parassolutions

📅 Nov 2023 – May 2024   📍 Mumbai, India

- Contributed to two major client projects during the internship.
- Built software that helps **banks** and **fintech clients** manage pending-loan notifications and communicate via SMS, email, and WhatsApp, improving **client interactions** and operational efficiency.
- Created a **vendor portal** to streamline **ID** and **business card ordering** from the ground up with React JS and **TypeScript**.
- Integrated **CRUD** operations with **Redux Toolkit** for seamless data management.
- Leveraged **Tanstack React Query** for efficient API management and data fetching.
- Successfully incorporated **Shadcn** styling, resulting in an aesthetically pleasing and intuitive interface for users.
- Reduced manual processes and increased productivity for financial institutions by delivering a **user-friendly** portal.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, C++
- **Frameworks/Libraries:** React, Next.js, Node.js, Express, Redux
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Other Skills:** Data Structures and Algorithms, Debugging
- **Tools:** Git, Docker, GCP, AWS, VS Code, Postman, Vim, npm

EDUCATION

B.E. (IT) - 9.00 CGPA

Xavier Institute of Engineering

📅 2020 – 2024   📍 Mumbai, India

PROJECTS

Case Canvas

- **Next.js | Typescript | Framer motion | React-Query | PostgreSQL | Prisma | Stripe**
- Developed CaseCanvas, a full-stack Next.js application enabling users to create personalised phone cases.
- Engineered a **robust backend infrastructure** using PostgreSQL and Prisma, with seamless **Stripe integration** for secure payments. Github

CommuniSafe

- **React.js | Node.js | Express.js | MongoDB | Google Maps API | PWA | i18n**
- Created a web application with **automated alerts**, local resource directories, and **real-time incident reporting**.
- Implemented role-based access control and integrated **geolocation** and multimedia features.
- This resulted in a robust **CRN** that promotes community collaboration and disaster resilience through essential information transmission and efficient response systems. Github

Freelansters

- **ReactJS | NodeJS | ExpressJS | MongoDB | Material UI | Styled-Components**
- Crafted a **freelancing platform** that streamlines project posting for clients and job searches for freelancers.
- Implemented advanced **search filters**, keyword optimization, and sorting functionalities to enhance user experience. Ensured security with **JWT-Auth** for user authentication. Github

ACHIEVEMENTS

- Surpassed **20,000+** downloads for the VS Code theme jellyfish-x-retro.
- Developed a **trending** Nextjs-starter-template, garnering attention and adoption within the **npm repository**.
- Achieved a 5-Star Rating on HackerRank in Problem Solving
- Secured **second place** in a hackathon hosted by SFIT.
